

4. It can be tricky selecting the Mask Image at first . Be sure you click on the target button of the grouped items. You can add a feathered edge or apply a gradient to the Mask. You can adjust the opacity of the selected Mask shape. Clicking on the image box in the palette will let you edit shapes used in your box. You can also release the mask within the Transparency palette.

5. Create a background for your image (keep it simple).

6. Create a shadow under your box using the Feather Effect with a Multiply blending mode.

7. For ★★★★★ duplicate your mystery item (not the box but what is inside) and place in a much reduced size at bottom of page with your name.

8. Print your work. **Remember to adjust settings first:** adjust the Quality/Speed slider in Document Setup, set the raster resolution in Document Setup..Printing and Export to double the line screen of final output (line screen on most laser printers is 85), also the Object..Flatten Transparency menu can also be used.
