---

**Asiya Free Lunches:** The Asiya free lunch program will continue in Guilder Hall on Mondays in November except on November 10. Come for the fellowship and bring your guests and prospects for shrine membership. Because of the holiday season, there will be no free lunches being served in December.

**Video calling made easy:** Video calling is an easy way to stay connected with your friends and family. Is it live? Yes. Can you talk to anyone in the world? Yes, as long as both you and your friend have a webcam, speakers, and the same video-calling software.

Basically, a video call is a live conversation between you and your family, friend, or colleague using video that's sent back and forth over the Internet.

A video call is like having a conversation over the phone, or an Internet chat session, except that you're seeing and hearing the person on the other end.

If you have far flung friends, relatives, or colleagues who you need to communicate with, video calling might even be better than being there. You'll save time and money – while staying connected. But if you want even more incentive consider this, the call is free.

Getting ready to make a video call is easy. All you need are the following four things; a high speed Internet connection, Video calling software from Skype, Microsoft, Yahoo, or AOL, external or built-in speakers, and a webcam.

Making a video call with a good webcam is important. With a good webcam, you benefit from innovative technology. The result is dramatically better sound and image quality, so the video that you send looks and sounds crystal clear.

An easy-to-use compact webcam makes getting started with video calling a snap. Upgrading to a smart sound and image enhancement webcam is a better choice. A top-of-the-line webcam such as the Logitech QuickCam Pro includes features such as Carl Zeiss optics with an auto focus system and a 2 Megapixel Sensor to provides high-quality video.
