- N. Maha Rules Jacket XS-XL 36.00
- O. Beach Towel 20.00

THE ***STIFF SKI***

MAHERAJAH'S NEWEST ***SUPER SKI***

Why do we call it the Stiff Ski? Simple!

Stiffness creates acceleration. The stiffer the ski, the faster it accelerates. Stiffness also provides for less work and consistent control—two more reasons why we build the Stiff Ski.

We have taken our unique fiberglass construction (patented IPC), mixed it with graphite and created the strongest and stiffest ski available. This means superior acceleration, one of the most crucial needs in slalom skiing.

The Stiff Ski is the finest and most advanced ski ever manufactured. It has proven this by successfully competing against other skis on the market since its introduction in January 1982.

On Labor Day of 1982, Harvey Frese rode the Stiff Ski to victory in the Veteran Men's Slalom Division, One Way Lake, Nevada, setting a new Western Regional RECORD of 4½ buoys at 35 off.

HARVEY FRESE

This is only the beginning. If you're interested in beating your "personal best," the Maherajah Stiff Ski is the answer.

MR. M DOUBLE WRAP/SPECIAL HIGH HEEL

The finest combination Maherajah manufactures. Locking yourself into the ski with ultimate support is the only way to control the ski effectively.

TEXTURED UNDERSIDE

Provides for superior grip through the turns.

TUNED BEVELS

Bevels are one of the most critical aspects in water ski design. Maherajah has tuned the Stiff Ski bevels to a proven specification, creating superior edge control and acceleration.

FIBERGLASS/GRAPHITE CONSTRUCTION

Maherajah's unique fiberglass structure (patented IPC).

Ski core cutaway illustrates Internal Pressure Chamber (IPC) core.

LENGTH
66"

WEIGHT RANGE
100-200 lbs.

BINDING SIZES
6-13

ADJUSTABLE WING FIN

The latest breakthrough in water ski development. A device created to provide necessary braking and assistance in holding the ski tail in the water through the progress of a turn. We have designed the most advanced adjustable wing (0-10°), without creating excess drag.

What we've created is a ski that's truly state of the art, designed especially to satisfy one goal...

INCREDIBLE PERFORMANCE

See for yourself!!
