The 66" or 70" Maherajah 360 is the most versatile ski in the world. The Maha 360 is designed for weights of 60 to 300 lbs. and speeds of 10 to 80 mph. Imagine, one ski that works well for the whole family! This ski will get Paul Bunyon out of the water easily. Good turns, good acceleration and good angles out of the turn make this a great all-around slalom ski. Wake jumping: you'll get all the air you'd ever want. Teaching new skiers is fun on the 360 because they get right up. Your choice of front binding.

Maherajah Classic Wood Slalom Skis are for skiers interested in true value. In the ski evaluations which appeared in the April 1987 issue of Water Ski Magazine, it was said that the Classic Wood Ski is the only ski that may even increase in value. Classic Wood is a performance ski that is extremely stable and smooth turning. Hard eastern Ash (vertical grain) is the main wood we use for strength and durability. We laminate the ash with beautiful exotic hardwoods - (Bubinga, Shedua, Purple Heart and Padouk). We use all solid hardwood, no veneers or soft cores. Maherajah Classic Wood skis exemplify aesthetic excellence and proven performance.

Front Adjustable, Plate
or Mr. M. Front Binding

For the most beautiful
ski in the world

Made for you

For prestige and pride
of ownership

For your safety

For the highest wall of
water you've ever made

THE ULTIMATE FIT:

MR. M. BINDING

"The absolute ultimate in personalized fit and support is the fixed plate binding with double crossing wraps. In total, there are four reinforcement straps: One for the toe, the heel, and two that cross from one side of the toe around the ankle to the rear of the heel. Although this type of binding generally does not feature the inner padding or softer internal rubber, the fit and support can be superb, making it the ideal choice for those skiers who demand the maximum in control." Built in sizes 6 thru 12.

↑ SLALOM HEEL HOLDER

- Easy to get into and out of
- Single foot starts
- For competitive and fun skiers
- Fits any ski

Dear Skier:

At Maherajah, we specialize in building slalom skis for high performance and fun. Our goal is to manufacture and sell the finest slalom skis in the world. When you call toll free 800 MAHA SKI, we will: 1. Answer any questions about skis or skiing, 2. Help you choose the right ski, 3. Build a ski for you that you will be proud to own, 4. Ship your order fast. (Custom-built skis take a little longer. We like talking directly to you, and helping you in any way we can. If you need more technical information, or wish to discuss something in more detail, feel free to ask for me personally when you call.

Sincerely, Bob Maher

SKI VEST

Maherajah Ski Vests: the quality you look for in a vest. Attractively designed in black with a red liner and four yellow, orange and red straps, our vests come in six sizes: XS, S, M, L, XL & XXL.

SKI CASE

The new Maherajah Ski Case is MORE than just a carrying case for your ski. It is fully padded and roomy so your ski is protected and you can also carry towels, gloves, your ski line and your ski vest right in the same case. Quality manufacturing makes our new case a fine addition to our line of accessories. The new Maha Ski case comes in two sizes: Short (for skis 66" and under) and Long (for skis over 66").

-WHY WOOD?-

Stiff skis are easier to ride. Wood and wood core skis maintain their stiffness longer than foam core skis. Wood skis do not chatter in rough water. Wood and wood core skis have better dampening characteristics than fiberglass or plastic foam core skis.

Eight Classic Wood Skis . . . may we build one for you?

If you are at the top of your weight range, it is easier to ski near the top of your speed range up to 34 or 36 miles per hour.
