

### CLASSIC WOOD SKIS

MAHA offers you the Exotic Classic and the Vintage Classic in your choice of the square back 360 or SP and HP design. Classic wood skis are constructed in 3 layers: core and bottom are multiple laminations of hard northern ash for strength and durability. The top of the Exotic Classic is laminated from ash combined with compatible hardwoods chosen for beautiful grains and color (pauingo, shodua and purple heart.) The top of the Vintage Classic is ash with a single accent strip of beautiful exotic hardwood. This ski has a nostalgic look but is built with today's performance features. The "Classics" have a high gloss epoxy finish on top with a thin, penetrating, textured epoxy finish on the bottom for better handling.

360 - The world's most versatile ski.

SP - Stable performance

HP - High performance

Call us direct and let us custom build the right ski, in the right size, for you.
