

Are you tired of mediocre photos of your listings. Are you fed up with stretched images that are not formatted to the MLS. Mother nature does not always give you ideal lighting and weather conditions for snapshot listing photos. Many homes have tremendous challenges with lighting, floor plan, etc. I can work around difficult lighting situations and deliver the best looking images possible.

Great photos need not be just for upscale homes. Even more modest residential listings will have a much broader appeal with quality photographs in your media presentations and on the multiple listing service.

I offer video tours and panorama photography including interactive panoramic images you can embed on social networks of your own website.

I offer services for both residential and commercial property. I am a licensed Realtor with MLS access so your neither you nor your seller need be present. It may be preferred to have you there if you have specific photos you want done.

Visit www.rodsager.com and click on "real estate" or email me rod@sonic.net.

R

od Sager spent nearly twenty years in the photo industry Rod has published numerous images dating back to his first sale to the Associated Press in 1980. Now a licensed Realtor, Rod has launched a professional real estate photography business for Realtors.
